

Molecular Cleaner

The perfect complement to our unique micro-dry steam technology: residue-free deep cleaning through the **natural power of enzymes**.

Molecular Cleaner is an effective and biodegradable enzymatic cleaner. Thanks to micro-splitting, organic contaminants are removed quickly and efficiently. This results in practically no residues in the form of surfactants or similar deposits. The working solution can essentially be used on all water-insensitive surfaces and is chemically completely harmless. So, when dry steam alone is no longer sufficient, you'll be on the safe side with **Molecular Cleaner**.

Enzymes are components of every living being. **Molecular Cleaner** makes use of enzymes to break down fats, proteins and starches, making it perfect for removing a variety of organic contaminants.

Application

- Dissolve ½ measuring spoon (2.5g) of the powder in ½ litre of cold water. It is best to use the specially designed spray bottle.
- Now spray the Molecular Cleaner solution on the soiled surface and leave it to take effect for 1–3 minutes. The enzymes will now do their work and break down the organic contaminants. For sensitive fabrics and surfaces, it is recommended to perform a test on a non-visible area to check for colour fastness.
- Finally, remove the solution thoroughly using micro-dry steam and a clean microfibre cloth.
- Once prepared, your Molecular Cleaner solution can be safely stored in the spray bottle for several months.

Areas of use

Professional cleaning of:

- carpets, upholstery, walls and ceilings
- all surfaces in kitchens and areas used for catering and food
- machines and industrial facilities
- glass, facades and awnings
- photovoltaic systems, and in fire damage restoration

Strong against:

- fat, oil and food residues
- soot and nicotine
- blood and protein
- insect dirt
- mould and moss
- adhesive residues, and much more

Living the future – rethinking hygiene

We take responsibility for conservation of nature and waste reduction – because the future belongs to our children.

Take advantage of the possibilities of modern cleaning and benefit two times over! You save energy, effort and time in your household – and we supply you with the professional product you need to do so.

The advantage for you is a pollutant-free and clean home – because you can't put a price on your health and quality of life.
